

AVer & ASTROS Conference

In the era of hybrid work, video conferencing has become essential. However, poor audio and video quality can make remote workers feel disconnected.

Wireless conferencing bridges this gap, enabling seamless, high-quality meetings, and engaging both in-office and remote workers.

- Improve audio and video quality to connect remote workers
- Help in-office workers start video sessions without complicated setups
- Smooth and seamless collaboration for both in-office and remote workers

Benefits of AVer with ASTROS Conference

Tailored solution for all meeting spaces

From cozy huddle rooms to spacious boardrooms, AVer and ASTROS combined solutions offer comprehensive support.

One click to start wireless conferencing

ASTROS Conference simplifies the process of initiating calls, sharing content, and enables users to concentrate on the core objective: productive collaboration.

Elevate your meeting experience with superb audio and video

Experience AVer's AI-powered features, such as Intelligent Lighting and Auto Framing, for enhanced participant presence and precise zooming.

ASTROS Compatible: Optimizing Your Meeting Experience

When a product passes Astrogate's compatibility criteria, it earns the ASTROS Compatible validation.

AVer is a certified ASTROS Compatible manufacturer dedicated to collaborating closely with us on both current and future product compatibility.
